

DO YOU HAVE A MASSEUSE ON STAFF?

Increase both your and your masseuse's business.

Statistics show that only one percent of all health club members take advantage of an on-staff masseuse on a regular basis. Common reasons for this are cost (\$50.00 plus per session), time constraints (fortyfive minutes to an hour for a massage), inconvenience (securing an appointment), and personal discomfort (disrobing and physical contact by a stranger).

The SpaBed gives your customers the ideal alternative. Your client will receive a complete massage for a fraction of the cost of a traditional massage. With a deep, penetrating massage targeting several key stress retaining muscle groups, a SpaBed session takes only minutes, and is comparable to an hour of traditional massage. Since the SpaBed is user operated, it's always ready to give a soothing, rejuvenating massage. Fully-clothed, your client floats on the pliant surface as heated water and air circulate through rotating jets. Since the user remains fully dressed, this provides an alternative to a massage requiring disrobing, along with unfamiliar personal contact.

In addition to increasing your business' profits and client base, the SpaBed can also increase the profits of your masseuse. As your clients realize the physical and stress relief benefits, you will I see an increase in the demand for both traditional massage and the hydromassage provided by the SpaBed. To further assist you and your masseuse, the SpaBed can also be used when your massage professional is unavailable, booked with another client, or is not able to keep a scheduled appointment.

Your clients will appreciate the choice in services. Your masseuse will appreciate the increased client base and schedule flexibility. Your business will appreciate the increased profits. Try it and see why the SpaBed is the perfect way to Relax the Mind, Rejuvenate the Body.
