

# Refresh, Renew. Restore.

## Finally! Hydro-Massage That's Dry, Safe, and Simple by SpaBed®

Now you can offer your clients one of the most asked-for services in the industry without having to hire and train new personnel. The Eurowave has been engineered to provide a convenient, inexpensive massage in just minutes. Eurowave combines heat, flotation and massage therapies to give you pain relief, stress reduction and an overall sense of well-being.

As pressurized streams of water massage the muscles, a pliant vinyl liner floating on a bed of heated water supports the user... and enables them to remain fully clothed and dry. No expensive training, increased personnel or additional licensing are required.

Convenient as a source for total massage, or as a relaxation tool for a massage therapist, your Eurowave will give clients endless hours of rejuvenation- and your business diversity and increased profits. Do something good for your clients and your business- make the Eurowave an integral part of your client services.
